

BECM Unlocking Service

Great Service We Offer to Our Customers

Do you want to install a used BECM into your Range Rover P38 ?

In order to do so, the BECM must be unlocked. Black Dog Manufacturing and Motorcars LTD/BPI can provide this service for you.

Product Description

The **BECM** is the Range Rover's Body Electronic Module. In order to replace and install a used **BECM** the replacement unit must be **unlocked**. The mileage must also be set to **0**. This requires the appropriate diagnostic equipment to reprogram the **BECM** unit. Once reprogrammed, the unit will function properly.

Send us your locked **BECM** unit and in many cases we can have it sent back to you the same day with a print out of the programmed values.

Features & Benefits

- Same day turnaround on most units
- We can set other supplied values: **FOB Codes, Vin#s, Mileage EKA Codes, EMS Codes, Date of Build**
- Each unit is sent back to you with a print out of the set values
- Ask About Quantity Discounts

Part# & Application

Range Rover P38
